City of Pompano Beach • 100 West Atlantic Boulevard • Pompano Beach, FL 33061

Press Release Date: 9/15/09

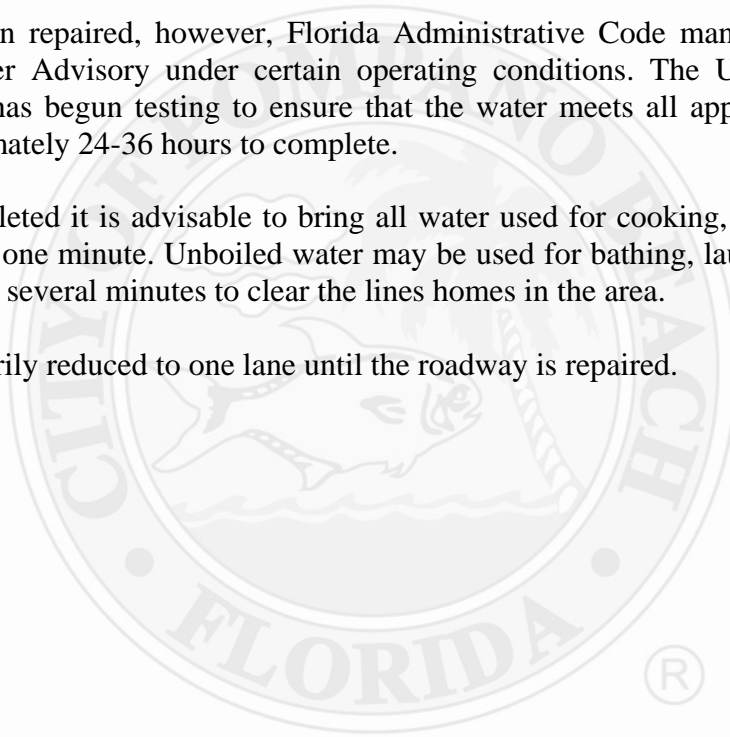

Water Main Break

Due to a potable water main break that occurred early this morning at 1421 South Ocean Boulevard, a local precautionary boil water advisory is in effect for City of Pompano Beach water customers in the Terra Mar Island, Rio Espana Condominium, Emerald Tower Condominium and Aqua Marine Condominium area. Notices have been distributed to residences in the effected area and a second notice will be distributed when the advisory is lifted.

The water main has been repaired, however, Florida Administrative Code mandates the issuance of a Precautionary Boil Water Advisory under certain operating conditions. The Utilities Department has flushed the system and has begun testing to ensure that the water meets all applicable standards. This testing will take approximately 24-36 hours to complete.

Until the testing is completed it is advisable to bring all water used for cooking, drinking or brushing of teeth to a rolling boil for one minute. Unboiled water may be used for bathing, laundry and irrigation. All fixtures should be run for several minutes to clear the lines homes in the area.

Traffic has been temporarily reduced to one lane until the roadway is repaired.
