City of Pompano Beach • 100 West Atlantic Boulevard • Pompano Beach, FL 33061

Press Release Date: 5/6/10

Semi-Annual Free Chlorination May 17th through June 14th

As part of our efforts to ensure that the drinking water we supply is the highest quality possible and to coordinate with construction at the water treatment plant, the City of Pompano Beach Utilities Department will begin free chlorine dosing of its entire distribution system on Monday, May 17th. The dosing will be in effect for approximately four weeks until Monday, June 14th. Chlorine dosing is a common maintenance practice used by utilities. The City of Pompano Beach free chlorinates the distribution system semi-annually.

During the free chlorination process, the disinfection portion of the water treatment process will change from using chloramines (a combination of ammonia and chlorine) to using free chlorine. Due to these changes, residents may experience a slight change in both the taste and smell of the water. The water will remain safe to drink, to use for cooking, to bathe in, and for other everyday uses. After the chlorine dosing is completed, the city will return to its normal method of disinfection.

The dosing will be performed in compliance with all applicable Florida Department of Environmental Protection and Broward County Health Department regulations. Persons currently undergoing dialysis or with a compromised immune system should consult their health care provider prior to the dosing to determine whether the change in disinfection will affect their treatment. In addition, anyone who has a fish tank or pond, including grocery stores and restaurants with lobster tanks and fish containers at bait shops, that uses city water should contact a pet or aquarium professional to determine the need for any adjustments to their aquarium treatment procedures during the chlorine dosing.

During this period the Utilities Department will also be flushing fire hydrants throughout the city. There may be periods of discolored water that will be temporary. Let your faucets run until the water clears up.

The City's primary focus is the quality of water that we provide to our customers. The chlorine dosing is being performed as a routine maintenance measure.

If you have any questions, please contact the Customer Service Department for assistance at 954-786-4637.
